

Surveyor's Report

Report describing the method used to determine the boundary. The report should include, as appropriate :

- Basis and method of determining the location of the MHWM or bank.
- Details of any differences between the observed location of the present MHWM or bank and previous definition/s. Provide considered qualified reasons for the difference (eg. erosion / accretion / error in prior survey, flood or reclamation).
- Position of all improvements relative to boundary as shown on plan.
- Information and/or statutory declarations from eye witnesses (e.g. long term residents).
- Professional Advice or evidence (e.g. land / estuary studies, geotechnical evidence, soil/bore hole samples, etc).
- Description of the land and land use. (e.g. whether natural, developed or affected by man).
- Provide photographs – current and historical. Terrestrial and aerial if appropriate with boundary superimposed.
- Provide (a) survey geometry file (dwg or dxf); (b) aerial images with present and previous survey overlays.

Modified Doctrine of Accretion (for sites within NSW Coastal Zone Only)

Is the area of land landward of the MHWM greater than by prior determination?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input type="checkbox"/>
Is the new MHWM definition indefinitely sustainable by natural means?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input type="checkbox"/>
Is Public Access likely to be restricted or denied?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input type="checkbox"/>
Copy of Field notes (relating to the measurement of the MHWM)?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input type="checkbox"/>

Fees

Deposit fee of \$275.00 is to be paid on application.

On completion of investigation by the Department, if more than a basic investigation is involved, the fee will be \$850.00 in total.

Survey Plans

Please provide three (3) signed and dated copies of the plan and the electronic files requested above on CD. The paper used must be:

- white and free from defects, blemishes and discolouration
- not less than 90 gsm (grams per square metre) in weight for plan drawing sheets
